

## **REDUCED RIB HEIGHT MULTI-RIBBED V-BELT**

### **Abstract of the Disclosure**

A multiple-ribbed V-belt having a plurality of circumferentially extending ribs defined by a plurality of grooves formed in a belt body. The V-belt is formed according to standard dimensions of a given V-belt section, except that the groove depth and overall belt thickness are reduced. In one embodiment, the depth of the grooves and the overall thickness of the belt are reduced by truncating the tips of the ribs.
